

(b) RTAS per-project distribution — box = Q1–Q3, bold line = median, diamond = mean, whiskers = 1.5•IQR, dots = 3,714 individual projects
Brackets = post-hoc pairwise verdict (***/ ns); full statistics and 8-number summaries in the panel below.

Pairwise tests (Welch = uncorrected two-sample t; Tukey HSD = strict family-wise corrected)						
pair	Welch p (Cohen d)		Tukey HSD p-adj		Tukey 95% Δ-CI	verdict
U vs P	6.18e-12	*** (d=+0.251)	0.0000	***	[+0.0117, +0.0240]	PASS ***
P vs N	3.61e-02	* (d=+0.096)	0.0821	ns	[-0.0146, +0.0007]	FAIL (ns, CI crosses 0)
U vs N	2.92e-13	*** (d=+0.349)	0.0000	***	[-0.0327, -0.0170]	PASS ***

Strict multiplicity-corrected ordering: University < Provincial ≤ National. P vs N is borderline * in Welch but FAILS Tukey HSD (p-adj = 0.082, Δ-CI crosses 0).
